EDUCATION

9/2021 - 9/2025

NONG LAM UNIVERSITY

- Bachelor of Information Technology
- GPA : 3.5 / 4.0

SKILLS

- Technical Skills :
 - Java, Python, JavaScript, TS.
 - SpringBoot, SpringMVC, Spring Data JPA, Spring Security, JWT, React JS, NextJS, WebSocket.
 - MySQL, Hibernate, PostgreSQL, Firebase API, Supabase, Appscripts API, FastAPI
 - Git, Docker, Treollo, Postman, Linux, Machine Learning-based analysis.
- Other Skills :
 - Team work and collaboration.
 - Basic English reading,
 - Problem-solving.

PROFILE

As a new programmer, I understand that I have a lot to learn. With foundational experience in Java Core, Spring Boot Framework, Web Technologies and Javascript Frameworks gained through university coursework and graduation projects, I have developed strong technical skills and self-directed learning abilities.

EXPERIENCES

TIN HOC DAI DUONG - IC3 Teacher

10/2025 - 6/2026

Assigned Task:

- Continuously improving IC3 skill sets and essential office software proficiency.
- Teach IC3 courses and basic office computing to students at schools and training centers.
- Conduct research on computer science, emerging technologies, cybersecurity, and Artificial Intelligence (AI).

VNPT INTERN PROGRAM - Java Developer

5/2025 - 9/2025

Project: User's profile Management

Assigned Task:

- Review and master the system's backend logic.
- Implement CRUD APIs for the profile module, including retrieving detailed records, fetching lists, searching, and updating profiles.
- Implement the system's information intake workflow: receiving data from employees, scanning documents, uploading to the system, getting managerial approval, updating the profile status to "Approved".

PROJECTS

SMART PARKING WEBSITE

1/2026 - 6/2026

Tech Stack : Spring Boot, SpringData JPA, MySQL, RESTful API, ReactJS, Tailwind CSS, Python, FastAPI, MySQL, WebSocket, Maven.

Assigned Task: Developed Frontend and Backend architectures to seamlessly integrate with RFID devices, AI cameras, and a Python-based server.

- User Interface Development: Built the responsive frontend using ReactJS, leveraging react-router-dom for seamless.
- Real-time Monitoring Dashboard: Designed a multi-camera live feed dashboard.

CERTIFICATION

- 600 Toeic - English
- IC3 Certification (900/1000)

- Automatically toggling the visibility of the "Open Door" control button based on authorization status.
- Developed intuitive GUIs for managing Resident Profiles, Guest RFID Cards, and synchronization tasks for RFID time-attendance machines.
- Designed and implemented secure CRUD APIs.
- Integrated the core backend directly with a Python server to orchestrate and control IoT hardware, including AI Cameras, time-attendance devices, automated gates, and RFID readers.
- Architected and managed the system's relational database using MySQL.

Social Web App

5/2025 - 7/2025

Tech Stack : React JS, Spring Boot, MySQL, Hibernate, RESTful API

- Implement Post Function, like Post, report Post of other User.
- User account management, view list of all user, lock or unlock any users.
- Realtime Chat from user and others, between user and admin using Websocket.
- Function add new friend function, allow user view their friend list in profile.
- Developed functionality enabling users to search for other users using their names.

ModKey Website

3/2025 - 5/2025

Tech Stack : Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, ReactJS, Redux, Context API, Tailwind CSS.

- Login and Login with Google using OAuth 2.0, with Security and User Authorization via JWT.
- State management with Redux and Context API for authentication, cart, and product data.
- Product browsing with filtering and sorting by category; products stored in MySQL and managed via phpMyAdmin.
- Shopping cart and order placement with secure checkout.
- Admin panel for managing products, orders, users, and inventory.

Encrypt-Decrypt Tool

12/2024 - 1/2025

Tech Stack : Java Core, JavaSwing, Maven, BouncyCastle Framework.

- If given input, user can choose one of the algorithms like Ceasar Cipher, Substitution Cipher, AES, DES, RSA, MD2, MD5, SHA and Digital Signature using RSA or DSA.
- The application has the function of creating a key to perform encryption, loading the key from the local machine or can type the key yourself, then the user can also save this Key to the machine.
- User can select ENCODE or DECODE to process input into result and program will display output in OUTPUT box.
